Its sound in English is uniform. It is never mute.

VEIN. *n. s.* [*vena*, Lat. *veine*, Fr.]

1. The veins are only a continuation of the extreme capillary arteries reflected back again towards the heart, and uniting their channels as they approach it, till at last they all form three large veins; the *cava descendens*, which brings the blood back from all the parts above the heart; the *cava ascendens*, which brings the blood from all the parts below the heart; and the *porta*, which carries the blood to the liver. The coats of the veins are the same with those of the arteries, only the muscular coat is as thin in all the veins, as it is in the capillary arteries; the pressure of the blood against the sides of the veins being less than that against the sides of the arteries. In the veins there is no pulse, because the blood is thrown into them with a continued stream, and because it moves from a narrow channel to a wider. The capillary veins unite with one another, as the capillary arteries. In all the veins perpendicular to the horizon, excepting those of the uterus and of the porta, are small membranes or valves; like so many half thimbles stuck to the sides of the veins, with their mouths towards the heart. In the motion of the blood towards the heart they are pressed close to the side of the veins; but if blood should fall back, it must fill the valves, and they being distended, stop up the channel, so that no blood can repass them. *Quincy.*

UN. A Saxon privative or negative particle answering to *in* of the Latins, and *a* of the Greeks, *on*, Dut. It is placed almost at will before adjectives and adverbs. All the instances of this kind of composition cannot therefore be inserted; but I have collected a number sufficient, perhaps more than sufficient, to explain it.

The examples, however, though numerous, might have easily been made more, for almost every adjective has a substantive and an adverb adhering to it, as, *unfaithful*, *unfaithfulness*, *unfaithfully* *Un* is prefixed to adjectives with their derivatives, as *unapt*, *unaptness*, *unaptly*, and to passive participles, as *hurt*, *unhurt*, *favoured*, *unfavoured* it is prefixed likewise to participial adjectives, as *pleasing*, *unpleasing*, but rarely in the verbal sense expressing action, we cannot say, the dart flew *unwounding*, though we say, the man escaped *unwounded*. *In* and *un* may be thus distinguished To words merely English we prefix *un*, as *unfit*, to words borrowed in the positive sense, but made negative by ourselves, we prefix *un*, as *generous*, *ungenerous*. When we borrow both words, we retain the Latin or French *in*, as *elegant*, *inelegant*, *politick*, *impolitick* Before substantives, if they have the English termination *ness*, it is proper to prefix *un*, as *unfitness*, *ungraciousness*. If they have the Latin or French terminations in *tude*, *ure*, or *ance*, and for the most part if they end in *ty*, the negative *in* is put before them, as *unapt*, *unaptness*, *inaptitude*, *unjust*, *injustice*; *imprudence*, *unfaithful*, *unfaithfulness*, *infidelity*

WATER. *n. s.* [*waeter*, Dut pœrep. Sax]

1 Sir Isaac Newton defines *water*, when pure, to be a very fluid salt, volatile, and void of all savour or taste, and it seems to consist of small, smooth, hard, porous, spherical particles, of equal diameters, and of equal specifick gravities, as Dr. Cheyne observes, and also that there are between them spaces so large, and ranged in such a manner, as to be pervious on all sides Their smoothness accounts for their sliding easily over one another's surfaces; their sphericity keeps them also from touching one another in more points than one, and by both these their friction in sliding over one another is rendered the least possible.

Their hardness accounts for the incompressibility of water, when it is free from the intermixture of air. The porosity of water is so very great, that there is at least forty times as much space as matter in it; for water is nineteen times specifically lighter than gold, and consequently rarer in the same proportion. *Quincy.*

X Is a letter, which, though found in Saxon words, begins no word in the English language.

Y.

Y, At the beginning of words, is commonly taken, though I think erroneously, for a consonant; at the end, and when it follows a consonant, is a vowel, and has the sound of *i*. It is used at the end of words, and whenever two *i*'s would come together; and in words derived from the Greek, to express the *u*. *Y* was much used by the Saxons, whence *y* is found for *i* in the old English writers.

Y is, in old English, sometimes prefixed as an increasing syllable to preterites and passive participles of verbs. It seems borrowed from ȝe, the Saxon *augmentum* of the preterite. It is sometimes put before present tenses, but I think erroneously.
